

# Back 'n Motion Total Pain Management

**Call 668-8855**  
**WWW.BACKNMOTION.COM**

**151 Pine Valley Blvd., London, ON**  
**(Across From Home Depot)**

**Back 'n Motion offers Low Intensity Laser Therapy**, one of the most promising and least known technology currently available. The **Bioflex Laser** was developed by **Meditech International** and is currently the most advanced system on the market, achieving a significant improvement/cure rate.

Laser Therapy acts by converting light into biochemical energy, resulting in normal cell morphology and function, which causes symptoms to disappear. Aside from the gradual elimination of inflammation, various degrees of the ablation of scar tissue, and osteophytes at all levels, there appears to be little question that a thin layer of cartilaginous regeneration can occur.

In **Meditech's** teaching clinic they perform 600 patient treatments weekly and the significant improvement/ cure rate is in excess of 93%.

Conditions that respond best to **Laser Therapy** are; tendonitis, osteoarthritis, strains and sprains, inflammatory conditions, sciatica, herniated disc and degenerative disc disease

Laser therapy treatments at **Back 'n Motion** are performed by **RMT's** who are also trained as Laser Therapists. The cost of these treatments is covered under the Massage portion of most insurance plans.

**The GII Unloader XT** effectively relieves pain associated with mild to severe unicompartmental **Knee Osteoarthritis**.

It is ideal for patients who wish to engage in normal to demanding daily activities and is suitable for a wide range of patient shapes and sizes.

The hinge accounts for two points of leverage, while the **Dynamic Force Strap®** (the diagonal strap over the knee) provides the third point.

By '**unloading**' the pressure from the affected area, there is usually a reduction in pain. Depending upon the level of pain experienced, the brace may provide the necessary relief. People with severe OA may wish to combine the brace with other forms treatment to experience maximum results.

## Meditech Laser Rehabilitation Clinic

*Clinical analysis of 1,000+ consecutively discharged patients at the Meditech Clinic (3 Studies)*
